

# Worksite for Functional Vision and Learning Media Assessment (FVLMA)

March 27, 2015

---

## Grand Opening on the Web!

Announcing the opening of the [Functional Vision and Learning Media Assessment \(FVLMA\) Worksite!](#) You asked for it and now you have it. It's free for purchasers of FVLMA and completely interactive!

The same protocols and forms that are in Sanford and Burnett's printed version of the FVLMA are now online. And there is no need to download, upload, install, or update anything!

The FVLMA Worksite allows the teacher, practitioner, or other member of a student's educational or vision team, to build a student's functional vision, and/or learning media assessment. It allows additions to the student's functional vision report when changes occur. It makes updates to the learning media assessment easy. It helps keep a yearly portfolio of the student's progress.

**Note:** In order to use the protocols and record-keeping features of the FVLMA Worksite, it is very important to have a hard copy of the FVLMA Practitioner's Guidebook. The instructions for conduction of the FVLMA Worksite protocols exist only in the FVLMA Practitioner's Guidebook.

The FVLMA worksite is password protected to keep student information confidential. **Try it out today!**

**FVLMA Kit: [7-96151-00](#) -- \$67.00**
