

Missouri School for the Blind Presents:

Missouri School for the Blind (MSB) is pleased to offer short-term services to students who are blind and visually impaired who are attending local school districts. **KEYS** (Knowledge to Empower Your Success) is an IEP driven individually designed short-course program created to address the vision-specific needs of students through direct one-on-one or small group instruction in the nationally recognized Expanded Core Curriculum.

KEYS short-courses are designed to provide intensive instruction, on a short-term basis, which will help students acquire the skills they need to perform successfully in the general education curriculum. Since skills acquisition is vertical in nature, students may benefit from different levels of **KEYS** at different developmental levels; therefore, students with visual impairments, ages 5 to 21, may request 3 to 18 weeks of specialized instruction per school year.
